- FY 2013 revenue increased 7.5% year-on-year to \$ 2,633 .3 million, supported by:
 - First full year of operations at OCI Beaumont
 - Calcium ammonium nitrate debottlenecking at OCI Nitrogen
 - Strong increase in traded volumes at OCI Fertilizer Trading (OFT)
 - Year-on-year improvement in methanol and melamine prices
- Positive developments were partially offset by:
 - Lower nitrogen fertilizer prices year-on-year
 - Continued natural gas supply disruptions in Egypt throughout 2013 resulting in lower utilization rates at both EFC and EBIC
- OCI Nitrogen completed the debottlenecking of its calcium ammonium nitrate (CAN) plant during the year and is now capable of producing 1.4 million metric tons, an increase of approximately 20%

Q1 2014 Trading Update – Fertilizer & Chemicals

Fertilizer & Chemicals

- The Fertilizer & Chemicals Group benefitted from positive contribution from Sorfert and higher volumes during Q1 2014.
- Positive developments were partially offset by lower prices year-on-year and a lower contribution from OCI Beaumont as a result of a period of unplanned downtime caused by an electrical power outage.
- Total product volume sold that was produced by OCI reached 1.4 million metric tons during the first three months of 2014, a 49% increase over the same period last year, primarily driven by:
 - Contribution from Sorfert despite intermittent shutdowns in January and February caused by new export license requirements for all producers in Algeria
 - These issues were resolved in March and the plant was operating at full capacity in April. We expect Sorfert to continue to produce at capacity for the remainder of the year
 - Higher operating rates at EFC and EBIC in Egypt compared to Q1 2013, but gas supply in the country remains volatile and the forward visibility is limited
 - Utilization rates at EFC and EBIC were lower in April than in Q1 2014 due to reduced gas supply levels
 - Higher calcium ammonium nitrate volumes following the debottlenecking at OCI Nitrogen
 - A drop in ammonia and methanol volumes at OCI Beaumont due to the unplanned downtime
- Benchmark prices for our products, except methanol, were lower than in Q1 2013, but increased compared Q4 2013

- FY 2013 revenue increased 23.3% in 2013 compared with 2012:
 - Supported by full integration of Weitz for the first time
 - Excluding the \$ 417.4 million contribution of Weitz, the Group's revenue increased by 8.6% in 2013
- Revenue partially offset by:
 - Approximately 60 days of reduced operations in Egypt due to curfews imposed across the country during the summer months
 - Reduction in revenue in Afghanistan where the US government has contracted its activities
- EBITDA margin of 3.7% for 2013, impacted by:
 - Deteriorating operating environment and productivity in Egypt, coupled with severe inflationary pressures in the country
 - Full integration of lower margin US-based work from Weitz
- The 2012 profits have been restated due to changes in the consolidation method for certain joint ventures and the transfer of certain profits from 2012 to 2011

Q1 2014 Trading Update – Engineering & Construction

Engineering & Construction

- The Group continues to expand its presence in key markets, focusing on the United States, Egypt, Saudi Arabia and Algeria
- We expect improving Engineering & Construction Group margins as recently awarded higher margin projects kick in
- The outlook for new construction awards in the MENA region remains positive as infrastructure and industrial spending packages are materializing
- Our business in Saudi Arabia is making excellent progress; we achieve double-digit EBITDA margins in the country , which we expect to have a positive impact on our blended margins for the Engineering & Construction Group going forward
- The outlook is also strong in the United States, where a rebounding economy and an increase in energy spending will create new awards opportunities. We continue to increase our presence in this large and promising construction market
